Autocorrection

pop-up dialog when word is spelled wrong

Existing text block (we generate these automatically after a delay)

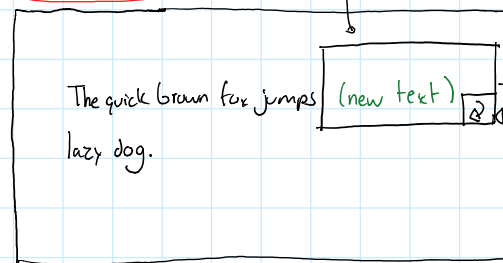

If we start writing here, append to paragraph block

If we start writing there or there, create a new paragraph block.

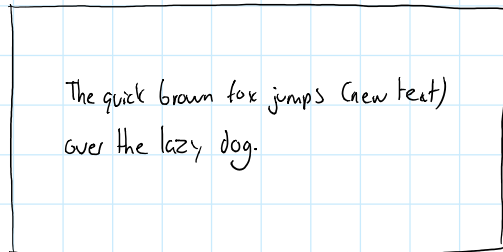

Text insertion

Create a stylus input field that can expand automatically

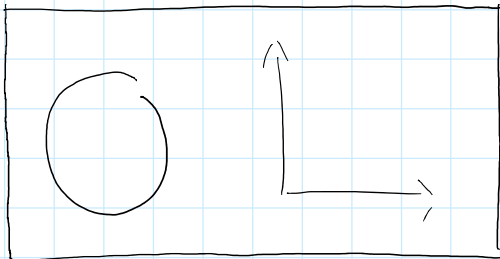

"Return" button if the user wants to insert a "line break"

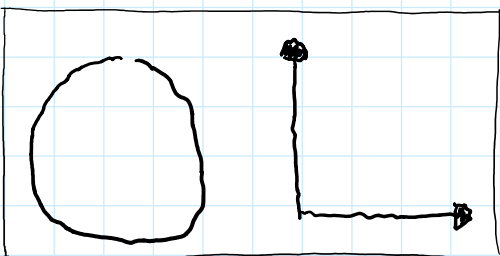

Text reflow

Graphs

becomes

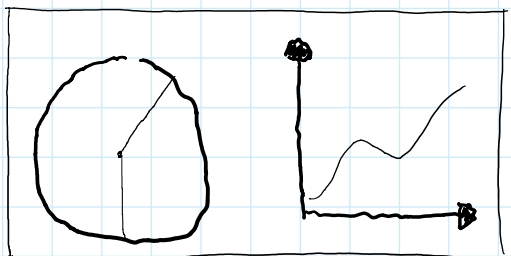

(I'm not good at imitating XERO style)

add more stuff

automatically rates

white things are draggable handles

add more stuff

automatically
generates
handles
and options
for coloring
the graph

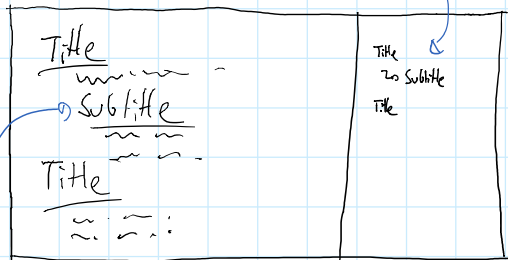

Automatically show a dialog to select the color of each section

Formatting

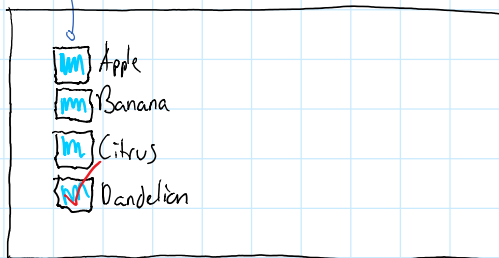

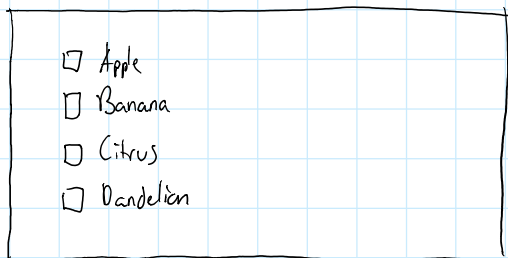

navigation view

clickable

check for underlining + horizontal alignment

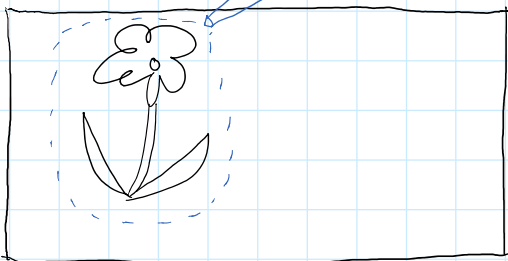

Give a slightly different color
to show that it is clickable

Search

Select an image \Rightarrow Render into png \Rightarrow Send to google search-by-image
 \Rightarrow select (better) image based on sketch

= cool

Deletion

Strike through
(once or twice)

How

Pelet, on

Strikethrough
(once or twice)

The lazy ~~brown~~ dog jumped
over the fence.

reflow

The lazy dog jumped over the
fence
